SOFTSOUND® SXT+

TWO-STAGE AIR CONDITIONERS FEATURING
THE OBSERVER™ COMMUNICATING SYSTEM

Advanced technology makes comfort easy.

Cool communicator.

Comfortmaker® SoftSound® SXT+ Two-Stage Air Conditioners featuring the Observer™ communicating system are designed to take your home to a new level of comfort and efficiency. Teamed with our Observer communicating wall control and a Comfortmaker communicating fan coil or gas furnace, the SoftSound SXT+ functions as part of a complete communicating home comfort system. Various components of the system “talk” to each other electronically, fine-tuning comfort levels while maximizing energy savings.

Quiet at work.

We build the SoftSound SXT+ with premium components for quiet performance. The two-stage scroll compressor with a deluxe sound blanket is at the heart of this cooling machine. A variable-speed fan motor that operates primarily on quieter, lower speeds is another premium feature (CCA9 models only). And operating sound is further minimized by advanced aerodynamic fan and air discharge systems. Plus, the SoftSound SXT+ typically runs at the lower stage, switching to higher operating levels as necessary to provide steady cooling when outdoor temperatures increase. Custom-matched with a Comfortmaker variable-speed communicating fan coil or gas furnace, this two-stage operation delivers whisper-quiet operating sound levels and superior humidity control season after season. As part of a complete system, the SoftSound SXT+ adjusts heating and cooling levels to match the needs of your home for a consistently comfortable flow of conditioned air.

R410A is an EPA-approved,
environmentally sound refrigerant.

Standard features that set high standards.

Quiet

The two-stage scroll compressor operates most of the time at the quieter, lower stage, changing over to the higher stage with warmer outdoor temperatures to produce more cool air. A deluxe sound blanket also reduces compressor sound levels.

Warranties you can be comfortable with.

Comfortmaker units are backed by exceptional warranties, including our No Hassle Replacement™ limited warranty, which gives the original purchaser a one-time replacement unit if the compressor or outdoor coil should fail due to defect within the first ten years. You also get a 10 year parts limited warranty upon timely registration.*

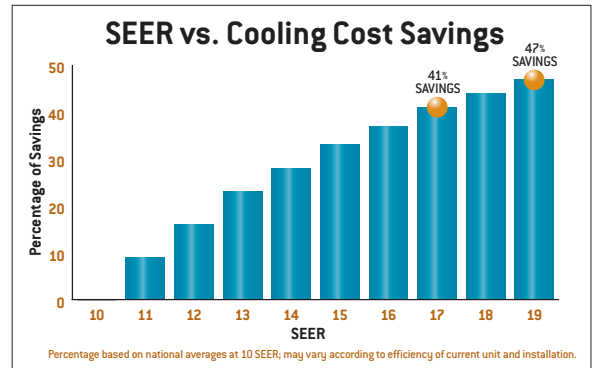

*Limited warranty period is 5 years for parts if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. Please see warranty certificate for further details and restrictions.

Higher efficiency for lower cooling costs.

Achieving energy efficiency ratings as high as 19 SEER[†], these are our most efficient air conditioners ever.▼ You could save up to 47% compared to an older 10 SEER unit!

†SEER stands for Seasonal Energy Efficiency Ratio.

▼19 SEER rating for CCA9 models when paired with select indoor equipment.

Four seasons of complete comfort.

A completely integrated system of Comfortmaker heating and cooling products can maximize comfort and efficiency.

- a. **Air Cleaner** filters out many indoor air pollutants so the air in your home is cleaner.
- b. **Full-Color Touchscreen Observer™ Communicating Wall Control** allows you to customize heating and cooling levels and can also save energy.
- c. **Humidifier** enhances comfort by reducing dryness in the air.
- d. **Communicating Gas Furnace** for maximum comfort and efficiency; seamlessly integrates with Observer communicating wall control to create ideal warmth and energy savings.
- e. **Communicating Air Conditioner** integrates seamlessly with Observer communicating wall control and communicating gas furnace to optimize comfort and energy-saving operation.
- f. **Evaporator/Indoor Coil** matches your Comfortmaker air conditioner and furnace to ensure great performance.
- g. **UV Lights** help prevent the growth of microbes on the coils. (Not available on all models.)

2 Durable

The painted, galvanized steel cabinet features a powder-coat, baked-on finish over galvanized steel with narrower spacing to provide maximum protection as it allows for proper airflow and easy coil cleaning.

4 Smooth Operation

The variable-speed fan motor (CCA9 models only) operates most of the time at quieter, lower speed. Aerodynamic air discharge design reduces operating sounds.

3 Efficient

The scroll compressor and the 7 mm copper tubing with aluminum fin coils work collectively to save on energy.

Observer™ Communicating Wall Control

The SoftSound SXT+ can be teamed with our innovative Observer communicating wall control, offering full-color touchscreen technology and coordinating with Comfortmaker communicating gas furnaces and air conditioners to create maximum efficiency and ideal comfort.
