

More than just
a thermostat.

WAY more.

12 WAYS more.

Check out

these **12 WAYS** that the new
TSTAT0101SC wall control unit
offers so much more
than just a thermostat.

- More for **YOU**...
- More for **YOUR CUSTOMERS**...

KeepRite[®]
THE PROS KNOW

www.GoKeepRite.com

■ More for YOU...

1. Gives you full advantage of KeepRite[®] communicating equipment.

Since the KeepRite communicating control is built by the same company that makes KeepRite heating and cooling products, it is the only control that can take full advantage of the features that make KeepRite communicating equipment so much:

- **EASIER TO INSTALL**
- **EASIER TO SERVICE** and
- **EASIER TO SELL.**

(4 Wires)

INDOOR

- VC 97-Fall 2011
- VC 96-Fall 2011
- VS 80-Now!
- Fan coils-Fall 2011

OUTDOOR

- SXT+ AC -Fall 2011
- SXT+ HP -Fall 2011
- SXC AC -Fall 2011
- SXC HP-Fall 2011

(4 Wires)

■ More for YOU...

2. Works with ANY KeepRite® system.

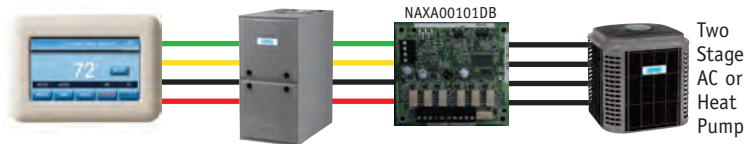

Even with non-communicating equipment, just add accessory daughter boards (NAXA00101DB) for simple, menu-driven set-up of these systems:

- Up to 4 stages of heat
- Up to 2 stages of cooling
- Air conditioners, heat pumps, gas & oil furnaces
- True dual fuel.

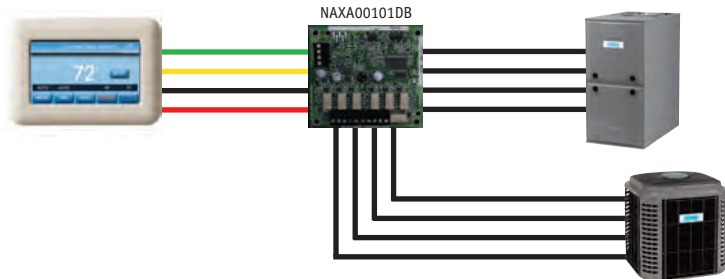

COMMUNICATING INDOOR WITH NON-COMMUNICATING OUTDOOR:

COMMUNICATING INDOOR WITH NON-COMMUNICATING OUTDOOR:

NON-COMMUNICATING INDOOR WITH EITHER COMMUNICATING OR NON-COMMUNICATING OUTDOOR:

■ More for YOU...

3. **Simple 4-wire installation.**

Just run four wires from the KeepRite® communicating outdoor unit to the communicating indoor unit and on to the control.

■ More for YOU...

4. **Faster installation & fewer callbacks.**

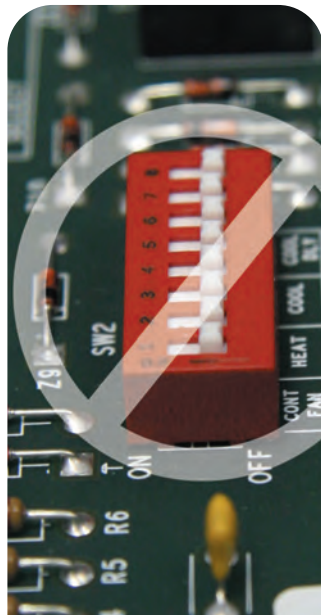

Conventional furnace installations can require an installer to check up to five wiring diagrams and configure half a dozen or more dip switch settings. When you install the KeepRite® control with compatible, communicating equipment, you won't need to consult wiring diagrams or set dip switches.

IT WILL AUTOMATICALLY:

- Find the attached equipment
- Display its information on the screen
- Prompt you to choose whether a humidifier is present, and
- Configure the system for optimal performance.

THAT GIVES YOU:

- **OPTIMIZED** airflows based on factory engineered calculations.
- **NO** dip switches to set
- **NO** need to look up wiring diagrams
- **LESS** opportunity for error
- **FASTER** installation, and
- **FEWER** callbacks.

■ More for YOU...

5. Easier to Service.

When you install this new control with compatible communicating equipment, it gives you two important advantages that make service easier:

- **EASY-TO-READ FAULT CODES**

You won't need to count flashing lights or look up fault codes on a list. The KeepRite® control will show you the last 10 fault codes—in plain English. For example, it will display “blower motor fault,” not just a number that you have to look up.

- **MORE INFORMATION**

The KeepRite control is programmed with 82 fault-code text messages, not just 10. Plus, it lets you see the last 10 fault codes—even if the power has been shut down.

Last 10 System Faults

09/09/11 10:00AM Low Pressure Switch – 12 Events – ACTIVE

09/08/11 10:00AM OD Comm Failure – 3 Events

09/08/11 10:01AM ID Comm Failure – 5 Events

09/08/11 11:00AM Blower Failure – 1 Events

09/08/11 11:15AM Defrost Stuck Failure – 13 Events

6. Displays your contact information.

The KeepRite® control gives you the option of loading your contact information so it can alert the homeowner to call YOU whenever it senses a problem.

You can also set up the KeepRite control to alert the homeowner to call you when it's time for routine maintenance.

7. Latest generation full-color touch-screen.

Give your customers the high-tech look they want with a KeepRite® wall control that offers:

- **SHARP-LOOKING APPEARANCE**
- **COMPACT, THIN DESIGN**
- **A NEW LOOK** that blends well with other homeowner touch-screen devices.

10. Filter & routine maintenance reminders.

Unlike most competitive models, the KeepRite® control can remind homeowners to change filters and call you for routine maintenance. You can set the control to display any of these reminder messages:

- **REPLACE AIR FILTER**
- **ROUTINE MAINTENANCE RECOMMENDED.**

Plus, you can load your company name and phone number so it will display along with the maintenance reminder.

11. Constant-fan speed choices.

Some thermostats offer only one constant-fan speed. On. This control unit gives homeowners a choice—low, medium or high—to match their individual IAQ and home comfort needs (with compatible communicating equipment).
