GENERAL DESCRIPTION

The FAST FP-RPOCA-series low pressure two-position damper was developed for precise control of supply air in the HVAC duct system. Rigid aluminum components provide a strong, yet lightweight construction. The damper actuator with built-in LED lights is designed for years of care-free operation. The power open/power close design guarantees precise control of supply air into each zone. Long-life nylon gears drive the opposed blades open and closed. Opposed blade design reduces turbulence in the air stream. 30 Second operation to full open or closed position. A minimum open position can be set to bleed air for ventilation or duct balancing. End of shaft marked with high-visibility blade position indicator. Custom sizes are available.
